Scaled Score: 740 Required Passing Score: 500 Status: Pass

This report below shows your performance on the LPI Level 1 Exam 101.

<u>Section Analysis</u>	<u>Percent Correct</u>
1. Hardware & Architecture	57%
2. Linux Installation & Package Management	93%
3. GNU & Unix Commands	100%
4. Devices, Linux Filesystems, FHS	93%
5. The X Window System	85%

Thank you for taking LPI's certification exam. Scores on the exam are scaled so the range is from 200 - 800.

Passing a single exam does not signify completion of an LPI certification. Certification is awarded after passing all required exams for a particular level. After passing the required exams, you will receive a printed certificate indicating that you hold the designated certification level.

Employers and others considering the value of professional certification are encouraged to review the LPI website or to contact LPI for more information. LPI recommends that achievement of professional certification be considered as one of many factors in evaluating the competency of an individual. Consideration should be given to the amount of time that has passed since the candidate completed an exam or certification in order to assess the currency of a candidate's skills.
